Reuse of styrofoam boxes used to transport fish, for vases

Environmental targets for the School in 2023/24

- 1. The School proposes to reduce water and electricity costs in the coming years.**
- 2. Placement and distribution of more Eco Points around the school.**
- 3. Make students aware of the noise created in the school corridors and common areas.**
- 4. Sensitize students and the educational community to healthy eating and avoiding products with excess sugar.**
- 5. In the electricity and waste recording grids, students still do not register every day.**
- 6. Our school won an Environmental Quality Certificate, in recognition of its commitment to the correct separation of waste, from the City Council of Funchal.**

Thank you for your attention!
