**"SMART TEENS. ONE READY MISSION!"**

**2020-1-TR01-KA201-093199**

**1<sup>st</sup> Teachers Project Meeting: [Sweden.25-29/October.2021]**

**3 school inspectors from Romania: participants**

The first meeting of the teaching staff was held to determine the study assignments and activities and to establish the "Ecological Integration/Green Action Committee". This meeting was also the first physical meeting between the partners. The project teachers (15 teachers) and the project teachers from the host country initiated the project and created a work schedule for the planned project activities. Practically, details were discussed about the operation of the project, its development, the basic aspects of administrative and financial management, the stages of intelligibility of the results related to the project objectives and the dissemination strategy.

The work between the partners was shared and ideas were presented about the materials to be used in the meetings. A detailed program has been established

which will be used for activities, methods to be used, dissemination/strategic tools and project evaluation. Project coordinators will prepare a detailed outline for the preparation and implementation of project activities and methods. The work program content, implementation methods, preparatory tasks and selection criteria will be created in this project meeting. The project teachers of the partner schools will try to develop a more effective project during a three-day study period.

There will be both decision-making roles and operational functions at the meeting. This will facilitate the implementation of the decisions taken.
